Submission to Tim Groser, Minister for Climate Change Issue

From Susie Lees [REDACTED]
[REDACTED]

In light of the governments inability to act on climate change I would suggest that NZ Intended Nationally Determined Contribution (INDC):

- (i) commit to a **global and NZ zero carbon target by 2050** with annual steps outlining reductions for every 5 year period until then which will be closely monitored.
- (ii) places an immediate **moratorium on fossil fuel exploration**, and pledges to phase out existing extraction within the decade. All subsidies, funding and tax breaks to the fossil fuel industry are also phased out within the decade
- (iii) includes **credible, transparent, cross-party plans**, with a legislated, independent Climate Commission to ensure NZ meets its targets and stays within the global carbon budget.
- (iv) Abides by the **articles laid out in Te Tiriti o Waitangi**
- (v) includes **health, fairness, and the true costs of inaction on climate change** in the assessment of costs and benefits
- (vi) follows a **transparent decision-making process** after the consultation process ends
- (vii) addresses all agricultural emissions by first auditing then examining ways to lower these.
