

Your submission to Clean Water

Helen Lindsay

Clause

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

Notes

I support the swimming targets

Clause

What do you think about the proposed amendments to the Freshwater NPS?

Notes

Despite the legislation in place, economic development is already considered to be more important than environmental considerations as current legislation is not rigorously enforced. I object to any change that would make it even easier for business interests to override the ability for wildlife to thrive and humans to enjoy a clean healthy environment as ultimately this would be bad for economic wellbeing.

Clause

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

Notes

I support targets for exclusion of stock from waterways but think the timeframes could be a bit tighter. Excluding stock however is not enough on its own and must be in conjunction with limits on stocking rates
