Objectives for the contribution

Do you agree with these objectives for our contribution? No

1b. What is most important to you? Having an intelligent policy that takes account of reality

What would be a fair contribution for New Zealand?

2. What do you think the nature of New Zealand's emissions and economy means for the level of target that we set?

We should not be setting targets. We should be aware of the consequences of climate change and work to adapt to it.

How will our contribution affect New Zealanders?

3. What level of cost is appropriate for New Zealand to reduce its greenhouse gas emissions? For example, what would be a reasonable reduction in annual household consumption? NO REDUCTION

4. Of the opportunities for New Zealand to reduce its emissions (as outlined on page 15 of the discussion document), which do you think are the most likely to occur, or be most important for New Zealand? Transport fuel use. But because of more efficient cars,

Summary

5. How should New Zealand take into account the future uncertainties of technologies and costs when setting its target? By not setting a target

Other comments

6. Is there any further information you wish the Government to consider? Please explain.
The climate will change. Some of the change may be due to human activity. But the increase in CO2 is likely to have been totally beneficial.

This questionnaire is so structured that it is almost impossible to provide a reasoned response.
