

Setting New Zealand's post-2020 climate change target

Submission form

The Government is seeking views on New Zealand's post-2020 climate change contribution under the United Nations Framework Convention on Climate Change (UNFCCC).

You can have your say by making a submission using this form or using the online tool available at www.mfe.govt.nz/more/consultations.

For more information about this consultation:

- Read our [Consultation on New Zealand's post-2020 international climate change contribution web page](#)
- Read our discussion document: [New Zealand's Climate Change Target: Our contribution to the new international climate change agreement](#)

Submissions close at 5.00pm on Wednesday 3 June 2015.

Publishing and releasing submissions

All or part of any written submission (including names of submitters), may be published on the Ministry for the Environment's website www.mfe.govt.nz. Unless you clearly specify otherwise in your submission, we will consider that you have consented to website posting of both your submission and your name.

Contents of submissions may be released to the public under the Official Information Act 1982 following requests to the Ministry for the Environment (including via email). Please advise if you have any objection to the release of any information contained in a submission and, in particular, which part(s) you consider should be withheld, together with the reason(s) for withholding the information. We will take into account all such objections when responding to requests for copies of, and information on, submissions to this consultation under the Official Information Act.

The Privacy Act 1993 applies certain principles about the collection, use and disclosure of information about individuals by various agencies, including the Ministry for the Environment. It governs access by individuals to information about themselves held by agencies. Any personal information you supply to the Ministry in the course of making a submission will be used by the Ministry only in

relation to the matters covered by this consultation. Please clearly indicate in your submission if you do not wish your name to be included in any summary of submissions that the Ministry may publish.

Questions to guide your feedback

Your submission may address any aspect of the discussion document, but we would appreciate you paying particular attention to the questions posed throughout and listed in this form. You may answer some or all of the questions. To ensure your point of view is clearly understood, you should explain your rationale and provide supporting evidence where appropriate.

Objectives for the contribution

- **1a. We have set the following three objectives for our contribution:**
- **it is seen as a fair and ambitious contribution - both by international and domestic audiences**
- **costs and impacts on society are managed appropriately**
- **it must guide New Zealand over the long term in the global transition to a low emissions world.**
- **Do you agree with these objectives for our contribution?**
 - Yes, but the second objective should start: costs, benefits and impacts ----
 - No
- **1b. What is most important to you?**

That NZ sincerely contribute and not rely on weasel words.

What would be a fair contribution for New Zealand?

- **2. What do you think the nature of New Zealand's emissions and economy means for the level of target that we set?**

NZ traditionally has excelled in basic agricultural research and a willingness to try new things. The trend to target research into those fields showing short term monetary gains is counterproductive and support should be widened to include more basic research such as :

- * identify and introduce different protein creators which can be acceptable in human diets.
- * Identify and introduce different animals which produce less methane in conversion of grass pasture to food.
- * Research extracting energy from hot subterranean rock (fracking + water injection?)
- * Devise means to encourage forest owners to transition to longer harvest cycles, as older forests absorb more carbon/ha and the shortfall after replanting will reduce.

How will our contribution affect New Zealanders?

3. What level of cost is appropriate for New Zealand to reduce its greenhouse gas emissions? For example, what do you think would be a reasonable impact on annual household consumption?

Because the potential risk avoidance benefits are huge and the investment is in the nature of an insurance, the appropriate cost per household could be comparable to a house/contents/car insurance.

4. Of the opportunities for New Zealand to reduce its emissions (as outlined on page 15 of the discussion document), which do you think are the most likely to occur, or be most important for New Zealand?

An important opportunity for NZ to reduce its reliance on urban transportation is : In major population centres that rely heavily on car use, free public transport for all should be introduced - benefits resulting would include enhanced productivity, reduced fuel usage, reduced expenditure on roading and allow higher density city housing (garages/parking space not included).

Summary

5. How should New Zealand take into account the future uncertainties of technologies and costs when setting its target?

By investing in research (as above), investing in alternate technologies as they come available and acting as though global warming were real, despite the presence of nay-sayers, in view of the overwhelming consequences should it come to pass. Probably at least a 10% reduction from 1990, preferably 20%.

Other comments

6. Is there any further information you wish the Government to consider? Please explain.

When your submission is complete

Email your completed submission to climate.contribution@mfe.govt.nz or post to Climate Change Contribution Consultation, Ministry for the Environment, PO Box 10362, Wellington 6143.

Submissions close at 5.00pm on Wednesday 3 June 2015.
