Climate Change Consultation Contribution

Patricia K. Mark

1. N.Z. should commit to 40% emissions ~~the~~ reduction by 2030
2. N.Z. should consider economic opportunities + advantages of aiming for low carbon economy

Having attended 2 public meetings it was apparent that both the Ministry for the Environment + M.P.'s are unaware of concern for N.Z.'s future + that of the Pacific Islands.

Why such a short time for submissions

Can you confirm if the Commissioner for the Environment will be consulted if not, why not??

R. Mark, QSO, J.P., B.Sc
