Objectives for the contribution

Do you agree with these objectives for our contribution? No

1b. What is most important to you?

That we stop playing about and spend the money we can save by doing nothing to change climate on the children on NZ.

What would be a fair contribution for New Zealand?

2. What do you think the nature of New Zealand's emissions and economy means for the level of target that we set? Nothing

How will our contribution affect New Zealanders?

3. What level of cost is appropriate for New Zealand to reduce its greenhouse gas emissions? For example, what would be a reasonable reduction in annual household consumption?

It won't, except to make them angry at paying for some programme that does nothing to make life better

4. Of the opportunities for New Zealand to reduce its emissions (as outlined on page 15 of the discussion document), which do you think are the most likely to occur, or be most important for New Zealand?

Summary

5. How should New Zealand take into account the future uncertainties of technologies and costs when setting its target? It should not contribute any taxpayer money to it.

Other comments

6. Is there any further information you wish the Government to consider? Please explain. Pleas stop wasting our time and money on this project
