Tim Groser, Minister for Climate Change Issues

Dear Minister

Please listen to the people and make the Intended Nationally Determined Contribution (INDC) adhere to the points below:

Commit to a **global and NZ zero carbon target by 2050** or sooner, with annual steps outlining how to get there as quickly as possible.

Place an immediate **moratorium on fossil fuel exploration**, and pledges to phase out existing extraction within the decade. All subsidies, funding and tax breaks to the fossil fuel industry are also phased out within the decade

Include **credible, transparent, cross-party plans**, with a legislated, independent Climate Commission to ensure NZ meets its targets and stays within the global carbon budget.

Mr Groser this needs to be our generations effort for the future just like our parents fought the extremists in the fifties. They were fighting for what was actually happening right then. Now we must fight for what every sane person can see will happen in the future unless we all take action. It is more difficult because we cannot see the enemy, but we must use our intelligence in the service of helping the children of the future.

Kind Regards

Elisabeth Mikkelsen
