Subject: Re: ETS Review started

We have submitted submissions in the past without anyone really listening to our points.

We are facing litigation from upsets client after the last changes to the ETS in May 2014.

Forest owners are all pretty much over the ETS after all the changes.

Subject: ETS Review started

The Government has started its review of the New Zealand Emissions Trading Scheme (NZ ETS) to assess its operation and effectiveness to 2020 and beyond.

This email provides information on the written submissions process for the review. The Government welcomes your feedback on how the NZ ETS is working, and how it might work better in future.

Written Submissions

The Government has released a discussion document setting out the key issues for the

review. This discussion document includes information on the NZ ETS and poses a range of questions for public feedback.

Written submissions are being sought on:

Some of the transitional measures that were introduced to moderate the impacts of the NZ ETS

How the NZ ETS needs to evolve for our future circumstances

Operational and technical improvements.

There are **two closing dates for submissions**. Some matters are being treated as priority matters because they may be candidates for legislative change during 2016.

Submissions on priority matters are being accepted until **5pm 19 February 2016**.

Submissions on the remainder of issues under review will be accepted until **5pm 30 April 2016**.

Technical notes will also be published on some issues in December and early 2016. These will provide further detail and analysis on matters under review. We encourage you to regularly check the Ministry for the Environment website for updates during the review.
