### **Submission - ETS Review**

The ETS has been ineffective for its purpose of reducing NZ's climate pollution, but actually counter-productive and an huge waste of tax payers' money and people's efforts.

I submit **not** to amend the ETS, but to **withdraw it entirely**.  
It should be replaced with a simple and gradually rising price on carbon through a carbon charge, the proceeds distributed equally to all New Zealanders.

Regards  
Rolf Mueller-Glodde
