Emissions trading scheme Submission

The Carbon credit claiming procedure for forestry is a brilliant piece of "Yes minister" Bureacrasy that ensures that most farmers and foresters will never receive or trade any credits for the carbon sequestered by their trees.

Meanwhile worthless credit created in Eastern Europe with the value of toilet paper rate alongside hard fought credits claimed by the successful few to devalue all credits and their credibility and the credibility of the entire trading scheme.

The entire scheme should be scrapped.

Kind Regards

Dave (&Nikki) Stanton
