Email [REDACTED]

## Objectives for the contribution

Do you agree with these objectives for our contribution?

1b. What is most important to you?

What would be a fair contribution for New Zealand?

2. What do you think the nature of New Zealand's emissions and economy means for the level of target that we set?

How will our contribution affect New Zealanders?

3. What level of cost is appropriate for New Zealand to reduce its greenhouse gas emissions? For example, what would be a reasonable reduction in annual household consumption?

4. Of the opportunities for New Zealand to reduce its emissions (as outlined on page 15 of the discussion document), which do you think are the most likely to occur, or be most important for New Zealand?

## Summary

5. How should New Zealand take into account the future uncertainties of technologies and costs when setting its target?

## Other comments

6. Is there any further information you wish the Government to consider? Please explain.  
New Zealand must live up to its international reputation for independent thinking and action and show LEADERSHIP in CLIMATE CHANGE. No fiddling with carbon credits. More research in farm emission reductions.
