

Your submission to Clean Water

Carl Reller

Clause

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

Notes

E.coli levels of reasonable for sewage discharge with a mixing zone but totally not acceptable for receiving waters. The risk level should be at least 1 in 100,000!

Clause

What do you think about the proposed amendments to the Freshwater NPS?

Notes

Unacceptable, simply confirms the status quo without making significant changes in a guaranteed period of time.

Clause

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

Notes

A one meter wide and 30 cm deep water way limit is far too large. Any stream which contains water more than half the year should be included.
