Objectives for the contribution

Do you agree with these objectives for our contribution?  No

1b. What is most important to you?  Abolishing any contributions.

What would be a fair contribution for New Zealand?

2. What do you think the nature of New Zealand’s emissions and economy means for the level of target that we set?  No contribution is fair.

How will our contribution affect New Zealanders?

3. What level of cost is appropriate for New Zealand to reduce it's greenhouse gas emissions? For example, what would be a reasonable reduction in annual household consumption?  No reduction is reasonable.

4. Of the opportunities for New Zealand to reduce its emissions (as outlined on page 15 of the discussion document), which do you think are the most likely to occur, or be most important for New Zealand?  Hopefully none of them.

Summary

5. How should New Zealand take into account the future uncertainties of technologies and costs when setting its target?  They shouldn't.

Other comments

6. Is there any further information you wish the Government to consider? Please explain.  Abolish the ETS period.
