Objectives for the contribution

Do you agree with these objectives for our contribution?  No

1b. What is most important to you?
Our survival. This is the most important issue facing humanity and is being trivialised herein. We know cabinet, with their oil-fired 19th Century dig-it, drill-it, burn-it"mentality" knows exactly what they will take to Paris, and this is just another PR exercise pretending that the government oligarchy is a democracy. It is not worthy of further response.

What would be a fair contribution for New Zealand?

2. What do you think the nature of New Zealand’s emissions and economy means for the level of target that we set?

How will our contribution affect New Zealanders?

3. What level of cost is appropriate for New Zealand to reduce it's greenhouse gas emissions? For example, what would be a reasonable reduction in annual household consumption?

4. Of the opportunities for New Zealand to reduce its emissions (as outlined on page 15 of the discussion document), which do you think are the most likely to occur, or be most important for New Zealand?

Summary

5. How should New Zealand take into account the future uncertainties of technologies and costs when setting its target?

Other comments

6. Is there any further information you wish the Government to consider? Please explain.
