

Your submission to Clean Water

Peter Dysart Trolove

Clause

What do you think about the proposed amendments to the Freshwater NPS?

Notes

Bryce Johnson of F&G was concerned that economic development was given greater weight than environmental protection (National radio 27/4/2017). Recent development in the form of dairy conversions and irrigation have caused unequivocal harm to aquatic ecosystems - many of Canterbury's streams and rivers have dried up this year!

Clause

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

Notes

A small gesture that does not mitigate over extraction of the resource

Clause

Do you have any other comments on the contents of the Clean Water discussion document?

Notes

There seems no sense of urgency to address the state of Canterbury's lowland rivers, lakes, and streams.
