Subject: ME 1293 water comments

I would recommend consideration of three elements in any amendments to New Zealand's water policy and legislation:

- consideration of payment for use of and or taking of ground water and surface water resources
- consideration of payment for pollution of surface or ground water
- consideration of annual reporting on the status of and issuance of permits for taking, and measurement of contaminants levels at a statistically significant number of locations and frequency.

Thank you

Mary Ellen Warren
