Tēnā koe - to whom it may concern

This is a submission about the Clean Water package 2017.

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

I think the swimming targets are not good enough. A target of 2040 is so far ahead in the future, it won't have any tangible effects on the rivers for a long time. Most of Taranaki's would not come under the targets, given that they are too small to fit your criteria. However, our kids often swim in small creeks and streams.

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

It is inadequate. I think all animals (ie beef, dairy, deer, pigs etc) need to be excluded from all rivers.

Ngā mihi
